

ThermoFisher
SCIENTIFIC

QUECHERS

Use Thermo Scientific™ QuEChERS Extraction Kits to prepare complex sample matrices such as fruits and vegetables for LC-MS or GC-MS analysis

SYRINGE FILTERS

Thermo Scientific™ Nalgene™ syringe filters are built to meet your lab's clarification and sterilization needs.

CERTIFIED VIALS KIT

Select the right vial for water analysis application using EPA guidelines. Thermo Scientific™ EPA Screw Vial Convenience Kits are available in assembled and unassembled convenience kits to save you time during sample preparation.

VIALS AND CAPS

Thermo Scientific™ headspace vials are available in clear or amber glass with a round or flat base, a crimp seal with a beveled or square edge finish, or with a screw-thread finish.

CRIMP AND DECRIMP

Achieve secure, repeatable crimps or remove seals with minimized risk of damage when you use Thermo Scientific™ Manual Crimpers, Decrimpers and Decrimping Pliers, also for use with National or Chromacol vials.

GAS FILTERS

Ensure high-purity (99.9999% or 6.0 grade) output gas for optimal GC performance using Thermo Scientific™ Super Clean™ Gas Cartridge Filters.

HPLC, GC COLUMNS

Perform fast and full separation of blood alcohols by headspace gas chromatography (GC) using Thermo Scientific™ TraceGOLD™ TG-ALC GC columns.

VACUUM MANIFOLD

Thermo Scientific™ HyperSep™ Glass Block Manifolds offer a simple way to quickly process multiple samples.

Get in touch with us now and ensure you never run out of your lab supplies. Ever Again.
